

Stepping Stones

Pupil Voice Autumn 2022

Our Pastoral Lead has been working 1:1 with the children to gain their view of school.

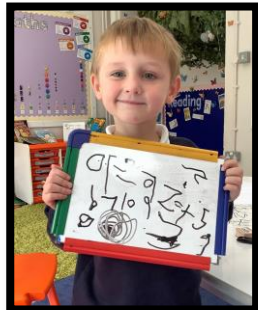

100% of children stated they enjoyed learning at Stepping Stones. They all agreed that they find the work interesting and learn new things. Every child said they are safer with their responses since coming to Stepping Stones.

Every child agreed that the teachers encourage them to do their best and speak up in class. They all stated that teachers praise them when they have done something well and give them help when they need it.

All the children agreed that the staff have helped support them with learning and their behavioural responses. All children stated they felt safe in school! The children believe that the teachers are interested in them and they enjoy coming to the school.

When asked about the strategies and support to help manage feelings and responses, the children agreed with the following statements....

The adult help me, giving me strategies.

The regulation stations in class help.

The coin system helps me make positive choice.

Movement breaks help and our tool kits.

The chill zone and safe zone support us.

The safe zone helps to keep staff and us safe. It is a place to go when we are in the red zone.

The children think we could improve in the following areas...

Reduce the noise in school. The children don't like the noise of others.

More art, computing, science, crafts!

More playtimes! More trips! (Less learning 😊)

For more children to know their behavioural targets.

Don't give us writing.

"It's hard when I am tired."
